

Note 1 – This period includes the IA FS, Bathymetry Survey and the identification of additional data needs to support the IA Remedial Design recommended by CSTAG.

Note 2 – The May 2007 AOC requires 3 FS Technical Memoranda be drafted by the CPG and approved prior to drafting the FS. The AOC mandates both a Draft and Final FS. EPA has determined the need to peer review the Bioaccumulation Model being produced by the CPG.

Note 3 – A period to evaluate the impact of the Upper 9-Mile Final Remedial Action on the Lower 8-Mile Remedial Action is included.

Preliminary Draft – For Discussion Purposes Only
